## **Rhonda Allison Introduces Blemish-Fighting, Skin Rebuilding Formula**

DALLAS, TX (July 14, 2010) – The Rhonda Allison, a pioneer in professional skin care, has recently introduced its new Blemish Complex – BPO Rx, a balanced blend of active bacteria fighting agents, and skin strengthening and soothing ingredients.

The Blemish Complex is a parabeparaben-free benzyol peroxide (BPO) formula that fights bacteria, calms, hydrates and works as an anti-inflammatory – a balance that is essential to acne control. Four key ingredients make up this advanced formula: **benzoyl peroxide**, to go deep into pores and break up build-up and excess oil; **Allantoin**, an anti-inflammatory that protects, soothes and hydrates; **Aloe Vera**, which aids in the healing process; and **Crosspolymer**, a film-forming agent that produces a protective shield on the skin.

The BPO complex in this formula has been specially formulated to reduce scarring, fight P. acnes (propionibacterium acnes), and unlike most BPO solutions, it prevents acne from building up a tolerance to it. The Blemish Complex - BPO Rx is a super-charged power blast of antibacterial support that not only clears skin, but also nourishes it. It combines the necessary soothing and calming qualities, with the right balance of bacteria fighting and sebum reducing support.

### **About Rhonda Allison**

Rhonda Allison, founder and CEO of Rhonda Allison Cosmeceuticals, is a highly regarded speaker, author and educator with more than 30 years' experience in the industry. Based on extensive research, she has developed synergistic formulas that combine the best of active natural ingredients with scientifically developed compounds.
